Parent and staff instructions - keep with the clinical sheet

Parents / guardians: Complete only the identification, allergies, medicines, and the upper-left Nutrition and Problems / Interval History sections. You may type in the available identification fields, then print. Leave measurements, risk-assessment results, screening scores, examinations, orders, vaccine entries, billing and signatures for staff. Bring **both pages** to the appointment. Do not send completed forms through the website.

Do not give medicine based on this form alone. Printed doses and vaccine sequence numbers on the clinical sheet are preserved workflow entries, not patient-specific orders.

Staff medication verification: Before any dose, verify current weight in kg, age, indication, allergies, product concentration, dose in mg **and** mL, interval, maximum daily dose and contraindications. Document clinician-approved instructions. Preserved numbers do not replace this check.

Age-specific clinical checks

RSV: verify age, season, prior antibody and maternal vaccination **in this pregnancy**. Use current AAP 2026-27 criteria: nirsevimab or clesrovimab for eligible infants under 8 months; nirsevimab only for eligible high-risk children 8-19 months entering their second season.

Before age 2, do not impose a routine low-fat or cholesterol-restricted diet. Use varied age-appropriate foods and individualized growth/nutrition counseling.

Car seats: rear-facing until the seat height OR weight limit, then a forward-facing harness to its limit, then a booster until the adult belt fits correctly (often age 8-12). Keep children younger than 13 in the rear seat.

Staff screening check: Use validated age-appropriate tools, not checkboxes alone: developmental screens at 9, 18 and 30 months; autism at 18 and 24 months; mental/emotional/behavioral screening per current AAP schedule.

Staff vaccine and billing check: Reconcile actual records, age, product, prior doses, minimum intervals and contraindications against current AAP guidance. Verify preserved protocol numbers, including combination-vaccine components. Billing presets are not orders: code actual services and payer rules; COVID-19 administration uses 90480, not 90460/90472. Do not automatically apply modifiers or unit counts.

Sources and version

Clinic revision based on AAP 2026 immunization guidance, current AAP preventive-care guidance and age-specific safety references. Original TNAAP 07/2025 attribution and intentional workflow marks are retained. This clinic revision does not imply TNAAP endorsement.

AAP preventive care | AAP 2026 immunizations | AAP current RSV guidance

Billing check: For non-COVID vaccines, 90460/90461 require qualifying physician/QHP counseling through age 18. Calculate units from vaccines and components actually given. Verify product codes, route, diagnosis, documentation and payer requirements with the billing team before use. For an eligible patient, COVID administration uses 90480 separately. Flu/COVID examples assume separate vaccines; verify coding for any combination product.

EPSDT CPT Coding:
99382-25 if New or 99392-25 if Est.
Z00.129 Normal or Z00.121 Abnorm
90460-59: non-COVID units ____; Z23.
COVID: 90480 if given (separate code).
90461-59: component units ____; Z23
96110-59 Z13.40
96160-59 Z11.1, Z13.88, Z13.84
99188 Z29.3
36416 if performed Z13.88
99000 if lead level obtained to be sent Z13.88
85018 if performed Z13.0
Vaccine codes as marked
Add E/M code if abnormal findings requiring treatment with -25 modifier

Circle Vaccines Administered:

DTaP/Hib +/- IPV: verify product, components and prior doses _____.
PCV15 or PCV20: record-based dose _____.

Health
☐ Weaning
☐ Whole milk until age 2
☐ Limit juice, milk intake
☐ Picky appetites, self feeding
☐ Offer varitety of foods
☐ Choking prevention
☐ Age-appropriate fats; see companion ☐
Individualize dietary counseling
☐ Balanced diet; see companion
☐ d/c pacifier/bottle
☐ Physical activity
☐ Brushing teeth

Social/Behavioral
☐ Set consistent limits, discipline
☐ Praise good behavior
☐ Discourage hitting, biting and other aggressive behavior
☐ Sleep, bedtime routine
☐ Talk, read to child
☐ Family
☐ No TV

Impression
☐ Well Child
☐ Normal Growth
☐ Normal Development
☐ _____
